CELEBRATING 5 YEARS WITHOUT A LOST WORKDAY!

On September 12, 2007, Precision Industrial Contractors, Inc. achieved a significant milestone – 5 years without experiencing a lost workday injury. Achieving this milestone attributed to the excellent quality of work our employees give us each and every day. We feel that it is important to recognize this accomplishment as a reminder that attention to safety needs to be a routine part of everyday activities.

"We have great employees on our team. Their daily efforts are the reason for this achievement." - Vice President Michael Barnes.

Precision Industrial Contractors mission is to eliminate "near misses" and decrease the most basic of accidents as a means to avoid more serious injuries that would require first aid, medical treatment, restricted work duty or lost work days. Thus far, we have been able to help achieve this goal with the use and enforcement of mandatory daily Safe Plan of Action, or what our employees refer to as SPA's. The SPA is a Pre-Planning Task worksheet that assists in the identification of potential hazards one might encounter in the work they will perform.

We enforce machine and equipment inspections as well as perform jobsite safety audits. Precision Industrial's Occupational Safety and Health Steering Committee member(s) execute the jobsite safety audits on a consistent basis. Our Steering Committee is made up of members of upper management, safety and field workers.

"Our team has worked hard to build a culture that emphasizes safety. It is a necessary and crucial element in planning and performing the work that we do." - President Bill Heermann

The entire management staff would like to personally thank every employee who works to ensure safety on the job. This extraordinary achievement is only a milestone in our goal to achieve one million man-hours worked without a loss workday injury. Precision Industrial is devoted to maintaining a safe work environment for all. Please join us in celebrating this monumental achievement by continuing to follow all safety procedures. and keeping our valuable employees safe.
